Throughout Spring 2016, encourage students in your school to read and review as many environmental books as you can—and some of them must be from The Nature Generation’s Green Earth Book Award winners list. For each book, students must fill out a book review form or create a video/trailer.

At the end of the Reading Challenge (it ends on May 15, 2016), collect all the student forms/trailers and forward them to us. We will award an E-Reader to the student submitting the most reviews/trailers. It’s that easy!

**School Instructions**

1. Decide if your school is going to participate in the Environmental Reading Challenge. Email the name of your school, a school contact name and email address, and grade and number of students participating to Jenny Schmidt at jschmidt@NatGen.org.

2. Talk to your students about the Environmental Reading Challenge, and give them the instructions. Help them find books with an environmental theme and provide them with the list of Green Earth Book Award-winning books to choose from. Remind students that some of the books must be a Green Earth Book Award winner or honor book. And no worries, we have books for Pre-K through age 21!

3. Collect the review forms and/or video trailers from your students.

4. Send the review sheets and/or videos electronically or by mail by May 15, 2016 to:

   Jenny Schmidt  
   jschmidt@NatGen.org  
   The Nature Generation  
   230 S. Aurora Street  
   Easton, MD 21601  
   ATTN: Reading Challenge

5. Wait to hear from us! We’ll notify you of your school’s winner and coordinate getting the e-reader to your winning student!

*The Green Earth Book Award is the nation’s first environmental stewardship book award. It is given annually by The Nature Generation to authors who write about how important it is to take care of our planet. Join us for our award ceremony and celebration this October 2016 in Washington, DC. Details can soon be found on our website.*
